Do They Change?

*YOUBETCHA!!*

**WHY?**

# Team Roles

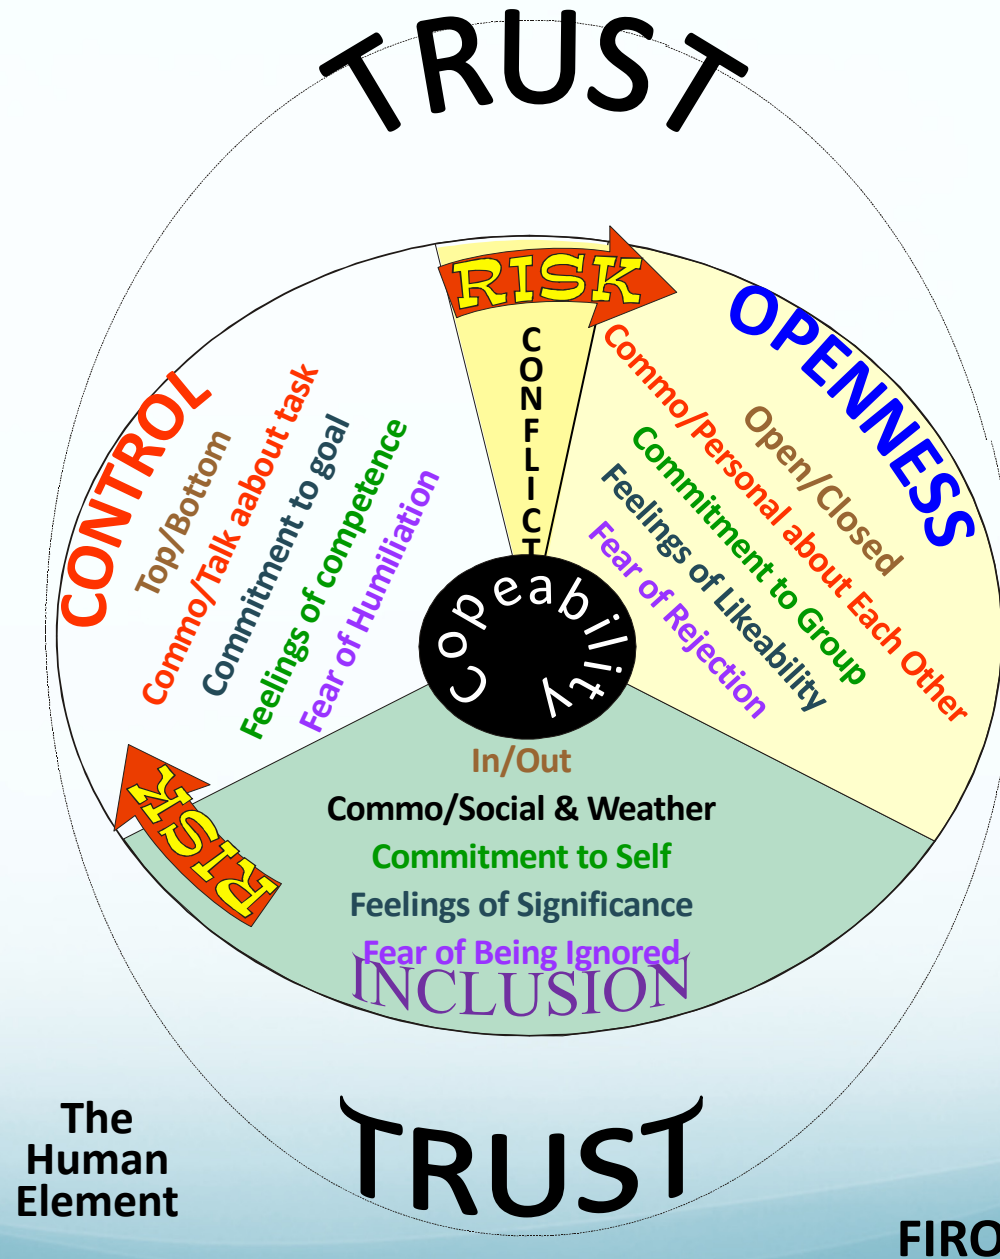

Team Roles change for a variety of reasons...

<https://www.youtube.com/watch?v=-H4wjRTvIVM>

As relationships change and we experience one another more fully the roles change and the need for roles may ebb or flow.

Communication, Commitment, Feeling, & Fear

Are powerful influencers and indicators of changing roles

## Tuckman's Model

Form

Storm

Norm

Perform

Adjourn

# *Form*

- Everyone is overly polite and pleasant. Most are excited to start something new and to get to know the other team members.
- During this stage, you may discuss:
  - ✓ Member's skills, background and interests
  - ✓ Project goals
  - ✓ Timeline
  - ✓ Ground rules
  - ✓ Individual roles
- As the group starts to familiarize themselves, roles and responsibilities will begin to form. It is important for team members to develop relationships and understand what part each person plays.
- But, because this stage focuses more on the people than on the work, your team probably won't be very productive yet

# *Storm*

- The point in a relationship where you become aware of a person's characteristics and they frustrate or annoy you?
- Once you're aware of their flaws, you either learn to embrace them or the relationship will end quickly.
- In the storming stage, the reality and weight of completing the task at hand has now hit everyone. The initial feelings of excitement and the need to be polite have likely worn off.
- Personalities may clash. Members might disagree over how to complete a task or voice their concerns if they feel that someone isn't pulling their weight. They may even question the authority or guidance of group leaders.
- It is important to remember that most teams experience conflict. If you are the leader, remind members that disagreements are normal.

# *Norm*

- People start to notice and appreciate their team members' strengths.
- Groups start to settle into a groove. Everyone is contributing and working as a cohesive unit.
- Storming sometimes overlaps with norming.
- As new tasks arise, groups may still experience a few conflicts.

# *Perform*

- In the performing stage, members are confident, motivated and familiar enough with the project and their team that they can operate without supervision.
- Everyone is on the same page and driving full-speed ahead towards the final goal.
- The fourth stage is the one that all groups strive to reach. Yet, some do not make it. They usually fail to overcome conflict and can't work together

# *Adjourn*

- In 1977, Tuckman added a fifth stage called adjourning.
- Once a project ends, the team disbands.
- This phase is sometimes known as mourning because members have grown close and feel a loss now that the experience is over.

# Team Dynamics In Review:

- Drives productivity.
- Driven by a collection of ever-changing team roles.
- Roles are a result of individual preferences and an ability / willingness to recognize and respond to the changing needs of self and others.
